SMART APARTMENT

Brilliant System: App

Control your home from your phone, from anywhere, with the Brilliant app. Available for iOS and Android.

LEARN THE BASICS

Lighting

Brilliant offers several ways to control the connected lighting in your home.

- Screen gestures
- Sliders
- Touchscreen
- Scenes
- Motion
- Voice
- Mobile app

LEARN THE BASICS

Lighting: Screen gestures

Lights ON

Flick up on screen.

Lights OFF

Flick down on screen.

Lights ON

Drag up/down on screen.

All Smart Lights in the Room ON/OFF

Flick up/down with TWO fingers.

LEARN THE BASICS

Lighting: Slider control

Lights ON/OFF

Tap on slider.

Dim Lights

Drag up/down on slider.

** Not all Brilliant Control Panels have sliders.*

LEARN THE BASICS

Lighting: More ways to control

Brilliant offers several other ways to control the connected lights in your home.

Touchscreen

Tap the “Lights” tile on the screen to see and control connected lights.

Voice

Use Alexa or Google Assistant (only Alexa is built-in).

Scenes

Tap the “Scenes” icon to control multiple lights simultaneously.

Mobile App

Use the Brilliant app to control your lights from anywhere.

Motion

Automatically turn lights on/off based on motion detection.

LEARN THE BASICS

Climate

Brilliant offers several ways to control the temperature in your home.

Touchscreen

Tap the “Climate” tile on the screen to adjust the temperature or change modes: heat, cool or auto.

Scenes

Add a specific climate setting to any scene.

Bedtime: Set temp to 66°, turn off all lights

I'm Home: Set temp to 71° F

Away: Turn off thermostat, lights, music

Set Schedules - To automatically adjust the temperature based on the day of the week and time of day, you can create scheduled Scenes using your Brilliant app or directly on your ecobee thermostat.

LEARN THE BASICS

Video Doorbells & Locks

Answer the door from your phone or any Brilliant Control. When someone rings your home, now everyone at home can see who's at the door.

Lock or unlock your door from your phone or any Brilliant Control. You can also add a lock action to any scene, like lock the door for "I'm Home" or "Goodnight" scenes.

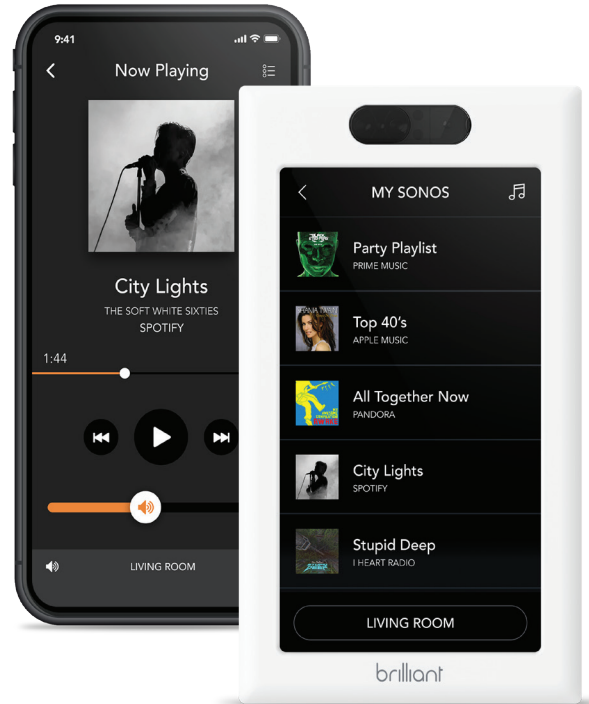

- See live video of visitors.
- Accept or decline calls.
- Hear and talk to visitors.
- Unlock and lock the door.

LEARN THE BASICS

Music

Enjoying your music has never been easier. Brilliant and Sonos offer multiple ways to browse and play music via touchscreen, apps, and voice.

LEARN THE BASICS

Music: Important things to know

Brilliant Control

If you want music to appear on your Brilliant Control, use the Sonos app to add songs, playlists, and stations to your “My Sonos” account from streaming services like Pandora and Spotify.

Voice

When using voice commands to play music, your request will play from your voice assistant’s default music service unless you specify a different service in your command (eg. “Alexa, play [song] from Apple Music.”)

Apps: Sonos & Streaming Services

You can stream music with your phone or tablet using the Sonos app or any streaming app like Pandora, Spotify, Apple Music, Google Play, and more that is compatible with Sonos.

Scenes

Add a specific playlist or station to any scene (eg. Relax Scene: dim lights to 40% and play [playlist]).

LEARN THE BASICS

Voice Control

To start controlling your home with your voice, log into the Amazon Alexa app and enable skills for Brilliant and your other smart devices.

Example commands:

- **Lights:** "Alexa, turn on the living room lights."
- **Music:** "Alexa, play jazz."
- **Scene:** "Alexa, I'm Home."
- **Weather:** "Alexa, what's the weather?"

*Also works with Google Assistant
(Google Assistant-enabled device required)

Don't want voice control or the microphone activated?
No problem. You can turn the microphone off at any time in the menu bar at the bottom of Brilliant's screen.

LEARN THE BASICS

Scenes & Automation

Control multiple devices simultaneously with a tap or your voice. You can also automate your home by setting schedules and timers.

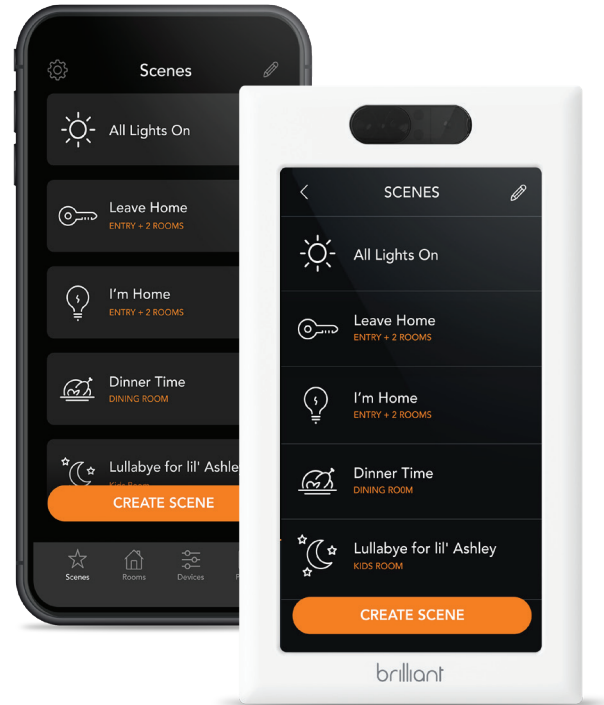

Leave Home

- All lights off
- Thermostat off
- Music off

I'm Home

- Entry lights 50%
- Living room lights 75%
- Thermostat 68° F
- Play "Relax" playlist

LEARN THE BASICS

Camera & Intercom

Check in on your home from anywhere. Brilliant Controls include a built-in camera with privacy shutter, microphone, and speaker.

Camera

- View live video of the built-in camera from the Brilliant app or another Brilliant Control.

Intercom

- Talk between between the Brilliant app and Brilliant Controls or between Brilliant Controls.
- Video chat between Brilliant Controls.

Don't want to use the camera? Or want to limit who can use the camera? No problem. You have full control over whether you want to enable the camera and who has access. Tap Settings > Privacy > Remote Video Access to edit your privacy settings.

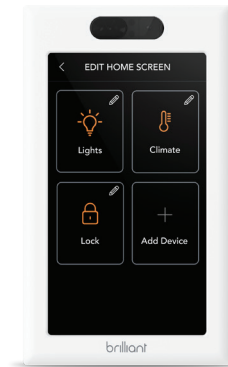

LEARN THE BASICS

Touchscreen Customization

Digital Photo Frame

Use the Brilliant app to upload images to display on your Brilliant Controls.

Home Screen

Customize the layout of your Home Screen by tapping Settings > Home Screen.

Don't want to use the camera? Or want to limit who can use the camera? No problem. You have full control over whether you want to enable the camera and who has access. Tap Settings > Privacy > Remote Video Access to edit your privacy settings.

Add Products

Interested in doing even more with your Brilliant Smart Home System? It's incredibly easy to add more Brilliant devices and Brilliant-compatible products. To see the full list, visit www.brilliant.tech or go to Settings > Works with Brilliant on your Brilliant Control.

SUPPORT

Troubleshooting

Having issues? Here's a couple things to check before contacting us.

Is your Wi-Fi and internet working?

Be sure that your internet connection is working and that your Brilliant Control is connected to your Wi-Fi network (must be connected to a 2.4Ghz network, 5Ghz Wi-Fi is not supported). You can use your Brilliant Control without Wi-Fi or internet connectivity, but functionality will be limited to controlling wired lighting only.

Is there a problem controlling a specific device?

Make sure the device is powered on and connected to the same Wi-Fi network as your Brilliant Control. If you are still having issues, try controlling the device using the manufacturer's app. If you are unable to control the device from the manufacturer's app, contact the device's manufacturer support. Otherwise, contact the device manufacturer's support.
